

Flowcharts :-

→ diagram to represent solutions of problems.

★ Solution :-

① Small parts (divide)

② logically arrange

* Components of Flowcharts :-

* Sum of 2 Numbers :-

* Calculate Simple Interest :-

* Max of 3 Numbers :-

* Find if number is prime? :-

Pseudocode

- ① Start
- ② input n
- ③ let div = 2
- ④ while div < n do
 - if $n \% \text{div} == 0$ do
 - print "NOT Prime"
 - Exit
 - else
 - div = div + 1
- ⑤ print prime
- ⑥ Exit.

* Sum of 1st n natural number :-

Logic :-

$$\text{Val} = \cancel{1} \cancel{2} \cancel{3} \cancel{4} 5$$

$$\text{Sum} = \text{sum} + \text{val}$$

$$\text{Sum} = 0 + 1 = 1$$

$$\text{Sum} = 1 + \textcircled{2} = 3$$

$$\text{Sum} = 3 + \textcircled{3} = 6$$

$$\text{Sum} = 6 + \textcircled{4} = 10$$

(value $\leq n$)

A logic

val = val + 1

if $n > \text{val}$ then

YES

if $0 \leq \text{val} \leq n$ then

YES

Print NO: Print

* Flowchart :-

* Pseudocode :-

- ① start
- ② input n
- ③ let val=1 & sum=0
- ④ while val $\leq$ n do
 sum = sum + val
 val = val + 1
- ⑤ print sum
- ⑥ Exit
